ELECTRIC SAFETY TRAINING - NFPA 70E

Part #	Description	Qty	Price
EST-8TECH	Electrical Safety Training – NFPA-70E & Arc Flash Training Electrical safety training is offered in four 2-hour modules conducted in 1 day with a lunch break at noon. The training is broken into modules to allow you to select the training content that matches your role whether you are an electrical worker (Modules 1-4), supervisor of electrical workers (Modules 1-2), or management (Module 1): Module 1: Introduction to Electrical Workplace Hazards & Safety (2 hrs) Module 2: What Electrical Workers and Direct Supervisors Need to Know (2 hrs) Module 3: Additional Info about PPE for Electrical Workers (2 hrs) Module 4: Electrical Measurement Safety (2 hrs) Please see the brochure and syllabus for additional information.		
	Date: JUNE 7, 2022 @ 8AM-5PM Location: Chicago/Palatine, IL Promotional price: Take 50% off with purchase of any electrical test tool from Fox River Systems.		8 hour - \$495/student
	Group on-site training is available for this class		CALL FOR QUOTE

INFRARED THERMOGRAPHY TRAINING & START-UP SERVICES

Part #	Description	Qty	Price
MODULAR-ORT	<p>On-Site, Modular Infrared Thermography Applications & Operational Readiness Training is an on-site class that can be customized in both content and duration to serve the unique needs of an organization. Fox River Systems works with you to understand your training goals and then develops a curriculum from the standard training modules used across our portfolio of training classes. Customized training can include: lecture, hands-on lab work, product specific training, and mentoring.</p>		CALL FOR PRICE QUOTE
ORT-SEM	<p>Operational Readiness Training for Fluke Thermal Imagers Seminar (4 hours) Focused on quick ramp-up for use and operation of Fluke infrared thermal imagers and introduction to Fluke SmartView™ software for reporting and analysis.</p>		
	<p>Date: DEC 13, 2021 @8am-12pm Location: Chicago/Palatine, IL</p>		\$ 295 per student
	<p>Date: TBD @8am-12pm Location: Chicago/Palatine, IL</p>		\$ 295 per student
INTRO-IRT	<p>Introduction to Infrared Thermography (1 day) Includes lecture and hands-on labs to provide a foundation for the use of thermal imagers across building diagnostic, electrical, and electro-mechanical equipment applications. Includes training materials and use of a loaner thermal imager.</p>		
	<p>Date: JUNE 6, 2022 @8am-5pm Location: Chicago/Palatine, IL</p>		\$ 595 per student
	<p>Date: TBD @8am-5pm Location: Chicago/Palatine, IL</p>		\$ 595 per student
ONLINE-INTRO-IRT	<p>Online Introduction to Infrared Thermography (1 day) Includes lecture and hands-on labs to provide a foundation for the use of thermal imagers with focus on electrical and electro-mechanical equipment applications. Includes printed training materials.</p>		
	<p>Date: DEC 20, 2021 @8am-4pm CT Location: ZOOM</p>		\$ 595 per student
	<p>Date: JAN 15, 2022 @8am-4pm CT Location: ZOOM</p>		\$ 595 per student
LEVEL1IR-GEN	<p>Level I Infrared Thermographic Applications + Operational Readiness Training for Thermal Imagers 32 hr. class and certification exam.</p>		
	<p>Date: DEC 13, 2021 – DEC 16, 2021 Location: Chicago/Palatine, IL</p>		\$ 2,190 per student
	<p>Contact us about other training dates and on-site training options.</p>		
LEVEL2IR-GEN	<p>Level II Advanced Infrared Thermographic Applications 32 hr. class and certification exam.</p>		
	<p>Date: JUNE 6, 2022 @ 1pm – JUNE 10, 2021 Location: Chicago/Palatine, IL</p>		\$ 1,995 per student
	<p>OTHER: Location:</p>		\$ 1,995 per student
IRT-PS	<p>Infrared Thermography Program Start-up (8 hours) This course provides a practical approach to starting up an infrared thermography practice as part of a reliability, maintenance, or service provider organization. Build on the techniques learned in prerequisite classes with information needed to work in a disciplined, programmatic manner with electrical, electro-mechanical, and buildings/roof applications. The course helps you establish the initial scope and scale of your new program. Discussion topics include: program goals, asset criticality, inspection frequencies, diagnosis/analysis, exception criteria, and complementary measurements to identify, categorize severity, and validate anomalies. Prerequisite: Level 1 Infrared Thermography Applications –or– Introduction to Infrared Thermography</p>		
	<p>Date: ****CALL US**** Location: ON-SITE or ONLINE TRAINING CLASS</p>		CALL FOR QUOTE
ORT-SV	<p>Analysis & Reporting with Thermal Imaging Software Fluke Desktop Connect™ and SmartView™/ FLIR Tools+ and FLIR Thermal Studio Learn how to make effective use of software for infrared thermal image analysis and reporting, including use of image data management strategies, image analysis tools, annotation features, and standard and development of custom report templates. Prerequisite: Laptop computer with MS-Windows and Microsoft Word</p>

MECHANICAL/VIBRATION TESTING - TRAINING & START-UP SERVICES

Part #	Description	Qty	Price
INTRO-MECH	Introduction to Machine Vibration Testing This training class provides an introduction to vibration testing of electro-mechanical machines to evaluate machine health and determine when to take corrective action to avoid breakdown. Common machine faults such as imbalance, misalignment, looseness, and bearing issues are reviewed along with the means of detecting these faults using vibration meters and vibration testers. Operational training on the Fluke 810 Vibration Tester with Viewer Software and the Fluke 805 Vibration Meter with Explorer 805 software puts students in a position to begin making measurements on machines.		
	Date: JUNE 9, 2022 @ 8am-5pm Location: Chicago/Palatine, IL		\$1,000/student
	Group on-site training is available for this class		CALL FOR QUOTE

Part #	Description	Qty	Price
ORT-FLUKE805	On-Site Fluke 805 Vibration Meter - Operational Readiness Training (4-8 hours) Focused on quick ramp-up for use and operation of the Fluke 805. Includes an introduction to machine vibration and condition monitoring, software installation assistance, and start-up of your company's vibration screening program.		CALL FOR PRICE QUOTE
ORT-FLUKE810	On-Site Fluke 810 Vibration Tester - Operational Readiness Training (8 hours) Focused on quick ramp-up for use and operation of the Fluke 810. Includes an introduction to machine vibration and condition monitoring, installation assistance for Fluke Viewer software, and essential procedures for defining machine drive trains and making measurements.
